

Interview Summary	Application No.	Applicant(s)	
	10/758,842	NIKOLAUS, THOMAS	
	Examiner	Art Unit	
	F. Daniel Lopez	3745	

All participants (applicant, applicant's representative, PTO personnel):

- (1) F. Daniel Lopez. (3) Thomas Nikolaus (inventor).
 (2) Gregory LaPointe (#34,309). (4) Angelo Brecht.

Date of Interview: 16 February 2007.

Type: a) ☐ Telephonic b) ☐ Video Conference
 c) ☒ Personal [copy given to: 1) ☐ applicant 2) ☒ applicant's representative]

Exhibit shown or demonstration conducted: d) ☐ Yes e) ☒ No.
 If Yes, brief description:

Claim(s) discussed: 66 and 67 (proposed . see Attached) FDL

Identification of prior art discussed: Cited prior art.

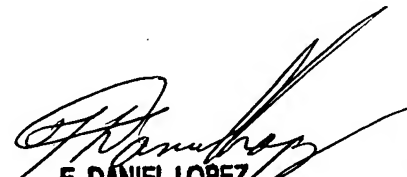

Agreement with respect to the claims f) ☐ was reached. g) ☐ was not reached. h) ☒ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed the limitation of "a transmission...for selectively drivingly connecting the rotor element to one or more of the plurality of hydraulic pumps". It is agreed that the cited prior art does not show this limitation. A further search will be needed.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

i) ☒ It is not necessary for applicant to provide a separate record of the substance of the interview (if box is checked).

Unless the paragraph above has been checked, THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN ONE MONTH FROM THIS INTERVIEW DATE TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

PRIMARY EXAMINER

Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

 Examiner's signature, if required

Docket No. 04-134

66. A wind power machine for the production of energy comprising:
a pylon;
a pylon attachment rotatably seated on the pylon;
a rotor element mounted for rotation in the pylon attachment;
a plurality of hydraulic pumps mounted in the pylon
attachment each pump having an output selectively connected to an
output line;

a transmission element positioned between the rotor element
and the plurality of hydraulic pumps for selectively drivingly
connecting the rotor element to one or more of the plurality of
hydraulic pumps;

regulation means for selectively connecting the output from
one or more of the plurality of hydraulic pumps to the output line
as a function of the power output of the rotor element; and

a monitoring unit for selectively connecting a generator and
or load to the output line as a function of the output from the
plurality of pumps in the output line.

67. The wind power machine as claimed in claim 66, including a
plurality of generators and/or loads each having a connecting
means for connecting the plurality of generators and/or loads to
the output line, wherein the monitoring unit selectively connects
the plurality of generators and/or loads to the output line as a
function of the output from the plurality of pumps in the output
line.

66A. A wind power machine for the production of energy comprising:
a pylon;
a pylon attachment rotatably seated on the pylon;
a rotor element mounted for rotation in the pylon attachment;
